Art Unit: 2154

DETAILED ACTION

1. Claims 1-13, 16 and 17 are presented for examination.

Specification

2. Examiner requests Applicants to update status of related application as mentioned in the disclosure, page 1, lines 6-9.

Allowable Subject Matter

3. Claims 1-13, 16 and 17 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, and 35 U.S.C. 101, set forth in this Office action.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-13, 16 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2154

A. The following terms lack antecedent basis:

- | | | | |
|-----|-------------------------|---|------------------------|
| I. | the payload | - | claims 1, 9 and 13 |
| II. | the other Internet node | - | claims 5, 8, 9 and 13. |

Claim Rejections - 35 USC § 101

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 9-12 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. As per claim 9, it would reasonably be interpreted by one of ordinary skill as a system of software per se, failing to fall within a statutory category of invention. Applicant's disclosure contains no explicit and deliberate definition for the term "module", and in the context of the disclosure and claims in question, one of ordinary skill would reasonably interpret the modules as software applications. As such, the system of modules alone is not a machine, and it is clearly not a process, manufacturer nor composition of matter [Please see MPEP 2106].

7. Applicant's arguments with respect to claims 1-13, 16 and 17 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2154

8. A shortened statutory period for response to this action is set to expire **3 (three) months and 0 (zero) days** from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the application (see 35 U.S.C 133, M.P.E.P 710.02, 710.02(b)).
